General information

We are pleased to inform you about the feature enhancements published in Release 6 of the LSDS platform. We are constantly making improvements so that our customers always benefit from up-to-date software. Some of the changes are directly visible on the LSDS platform, others are more in the background to enhance performance and ensure up-to-date security standards.

Next is a graph displaying the connections between the LSDS platform modules. On the next pages, you will find the new features for each of the 5 modules in the graph.

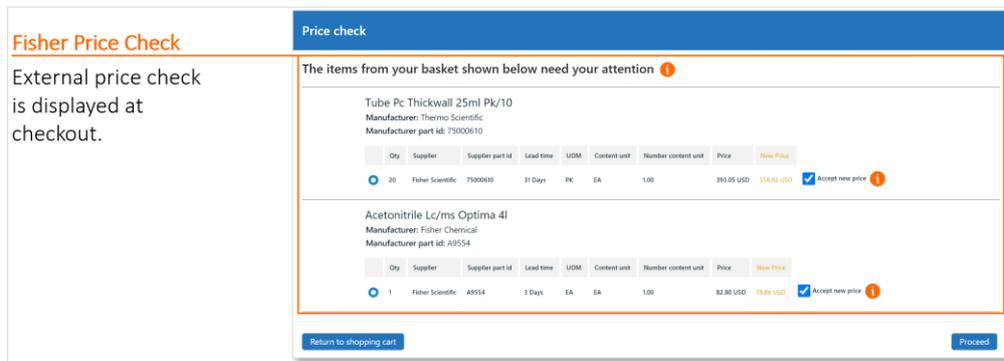

LSDS Platform - Customer specific Marketplace

[Fisher price check](#)

Relevant for: All customers

Introduction of price check for Fisher catalogs when the shopping cart is submitted to avoid any price discrepancies during the ordering process.

Fisher Price Check

External price check is displayed at checkout.

Price check

Return to shopping cart Proceed

[DEA check](#)

Relevant for: All customers

DEA checks based on CAS numbers provided through punchout catalogs to ensure data integrity for regulated products.

[Ariba readiness](#)

Relevant for: All customers

Enabled the LSDS platform to connect to a Ariba Buyer procurement system.

[External webshop enhancements](#)

Relevant for: All customers

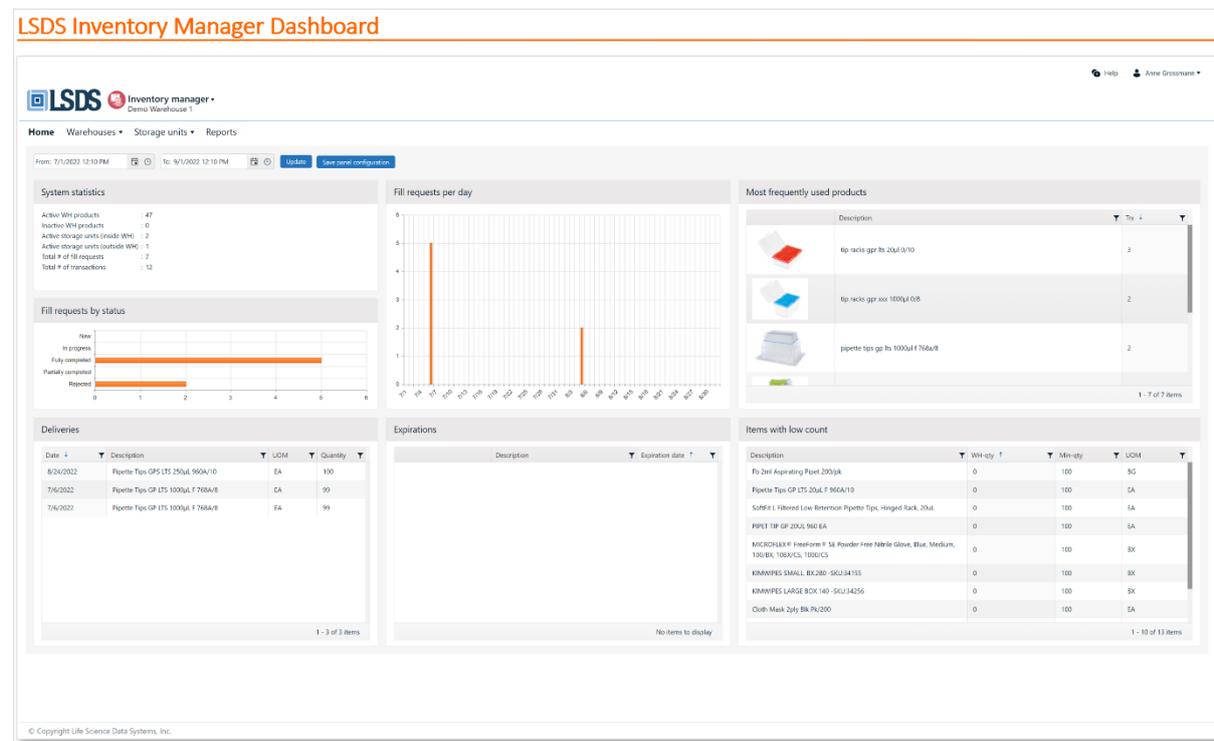

Improved external webshop (punchout) handling when sending customer specific information at login to an external webshop.

LSDS Platform - Inventory Manager

[Inventory Manager dashboard](#)

Relevant for: Customers who have subscribed to the Inventory Manager module

Introduction of the Inventory Manager dashboard. The most significant Inventory Manager KPI's are shown at logon (e.g. Deliveries, Low Count, Expirations, etc.).

[Filter handling](#)

Relevant for: Customers who have subscribed to the Inventory Manager module

Improved filter handling for fill requests.

LSDS Platform – Device Manager New module

Device Manager

Relevant for: Customers who have subscribed to the Device Manager module

Introduction of the new module "Device Manager". The Device Manager allows to maintain and track lab devices and creates an overview of what is available within your labs and organization.

LSDS Device Manager
Help | Anna Grossmann

MANAGE LAB DEVICES
Gives an overview of all existing devices and enables efficient management including associated equipment, consumables and services.

ASSIGN
With just a few clicks, administrators can easily assign the right accessories or spare parts to a device. This saves the user valuable time.

TIME SCHEDULING
The schedule provides the ability to book a device for a specific time. Thus, one device can be available to multiple users, saving resources.

DEVICE HISTORY & REPORTING
Among other things, Reporting can be used to print QR codes for devices and the Device History can be used to track every step of the process.

Device id	Name	Device type	Manufacturer	Manufacturer part number	Owner	Type	Device status
1	Coffee Machine Nespresso "Essenza Mini"	Coffee machine	Nespresso	Nesp0003	Udo Grünhoff	Catalog	In use

LSDS Platform – Platform Manager

Supplier Portal

Relevant for: Suppliers

The enhanced LSDS Supplier Portal provides an overview and status of catalogs uploaded and allows to send and receive notifications around catalog updates.

LSDS
Anna Grossmann

Upload

Catalog upload section to upload new and updated catalog files.

Status

Current status of each catalog file uploaded.

Settings

Contact settings and email notifications (e.g. get notified when a catalog was approved).

Download

Download LSDS Supplier Portal documents such as the current catalog template.

Notes

All notes added to a catalog file are visible in this section.
